1. SketchPad For My Doodle

2.Answers to questions

• What sparked your interest in Computer Science?

Artificial Intelligence.

As we know, we are facing with a high-speed developing society. There is not safety enough people for us to do research or work such as explore the space. It's necessary for the appearance of the AI, Which can replace human to do such dangerous things or hard things. What's more, AI could do beneficial to those disabled and make them live easier.

• What do you hope to have learned by the end of this module?

I thought I would study the basic skills of programming and the content of java.

• If you could develop an application, what would it do?

It would conclude friendly and beautiful UI and it will have a brief introduction so that people will use it easier. It will contain only a few functions but they must be perfect and could make me fell satisfied.
